Prantakatha Covid Response is a team led by youth volunteers who believe that in this national crisis, as citizens of India, they need to rise up to the challenge and help fellow citizens with whatever little resources they have.

This group is operating through social media. It has four pillars of operation.

1. Data mining - sourcing information around home isolation support essentials for covid care , ambulance, medicnes, food for isolated families etc.

2. Real time verification of data - in every 6 hours data collected are structured under four colour codes -

 green - active,
yellow- fast ending ,
grey- depends on availability,
red - exhausted

3. National coordination with groups across states - since we are part of different national youth coalitions, data and support across states are also accessed and put under point 1 & 2

 Want to volunteer ?

 Following are the areas where you could help

 Verticals of Support (VS)

 VS1. As lead generator - help us providing any lead that is helpful for covid patients in WB

 VS2 . Data verifier - help us in verifying collected data in real time by calling those numbers . You may choose any particular vertical or sub vertical based on your availability and resources

 7VS3 . Foot soldier : in case you are vaccinated and or you are confident , in few cases you may use your own vehicle to drop essentials to any particular location close to you.

If you are willing, please drop us an email with your contacts.
Please clearly mention number associated with a particular vertical of support, like VS1 or VS2 or VS3

email: prantakathaindia@gmail.com

4. FCRA Reg. No : 147121086
